

Issues And Improvements:

Test Form – Name Page

- 1.1 Actual : There is no limit of characters in the first or last name fields.
Expected: There should be limit of entry. For example : maximum 50 characters
- 1.2 Expected: Special characters or digits should not be allowed as entry in the first and last name fields.
Actual: All entries are expected, no validation present.
- 1.3 By design or defect?: Is first name or last name mandatory ? Logically, At least first name should be a required field.

Date Page

- 1.4 Date page: 12-23-2323. I can enter a date in the future
- 1.5 If I enter 45 in month, it automatically corrects it but does not show a warning.
- 1.6 If I enter invalid numbers, it automatically corrects it to a random date. Is this by design or a defect ?

Security Question Page

- 1.7 There should be a validation for input in the security questions' answer field.

File Upload Page

- 1.8 No apparent limit warning on how many files could be uploaded

DEFECT Reports are not written yet.

They will include

ID, Reported By, Date, Summary, Title, Steps to reproduce, Expected result, Actual result, Severity, Priority, Browser, Operating system, Software version or URL and Attachments (Screenshots and/or logs)
